

Bio-fix

IVD In-vitro diagnostic medical device **CE**

CND Code: W01030705

Catalog number	Unit size
05-X200	4 x 200 ml

Packaging Primary container: white PVC bottle with spray and protective cap. Useful capacity 200 ml. Serigraphy resistant to water, alcohol and solvents.
Secondary container: carton box.

Wear, water, alcohol and solvents resistant PVC label. Scratchproof ink resistant to water and alcohol.

Expected aim Product for the preparation of cyto-histological samples for optical microscopy.

Application Spray fixative for vaginal cytology.

Fixation technique

- 1) Spray evenly on the smear (3-4 times). Wait for 7 minutes, until the protective film is formed.
- 2) The formation of a resistant and soluble film allows to best preserve the cellular material until staining.
- 3) The fixed smear can be directly stained. Nevertheless, removal of the waxy film in distilled water (1-2 minutes) is recommended.

Components

Components	CAS	CE	Index
Ethanol 55%	64-17-5	200-578-5	603-002-00-5
Isopropanol 30%	67-63-0	200-661-7	603-117-00-0
Hydrosoluble polymers 5 %	-	-	-
Deionized water 10%	-	-	-

Warning and precaution

The product must be used exclusively by specialized technical operators.
The product is classified as hazardous.
Read with attention the information written on the label (dangerous symbols, risks and safety phrases).
Consult always the safety data sheet where the information about the risks of the preparation, precautionary measures during use, first aid and disposal are available.
Do not use if primary packaging is damaged.

Storage Store the preparation at room temperature. Keep the containers tightly closed.

Stability After the first opening, the product is usable until the expiry date, if correctly stored. Product validity: 5 years.

Disposal Hazardous preparation: observe all state and local environmental regulations regarding waste disposal.

Date of issue: December 2018
